Yes, besides the 45 days there is nothing, thanks. Its funny, he asked for someone to call him but he did not leave a number. I will find him on the internet.

You are missing the 45 day response requirement for certain requests. If not subject to the 45 days, we will still endeavor to review and respond/decide in a prompt fashion.

Sure, his name was on that spreadsheet list. But the answer to his question is pretty much open ended unless I am missing something.

Subject: FW: question from website on AEs

Hi Michele,

Can you please respond to Simeon. This is somewhat curious, but I would recommend you give him a call and discuss it that way. Good opportunity to connect with one of the key D4 folks.

Thanks,
David

Subject: question from website on AEs

Hi David,

Holly suggested we forward a question that Jeff received through the EPA website about aquifer exemptions to you. Would you like to take a stab at answering? The question is from a CA Dept of Conservation employee.

Thanks, Jill

Comments:

What is the timeline for the EPA review of an aquifer exemption application submitted by a state?

I will appreciate it if somebody could call me and/or explain the timeline.

I am not talking about the criteria, but rather, how long before EPA responds to a submitted application? Is there a statutory requirement or mandate that spells out response time. In California, for instance, there is a statutory requirement that an agency respond to a permit application within ten days.

Is there a similar requirement on a federal level especially with regards to aquifer exemption application?

Your response will be appreciated.

Thanks,

Simeon Okoroike.
